RE: Smoking Compositions of Southwick and Grubbs
PM 944 D&O PM-81-5

Dear George:

Here are comments and corrections on the draft application of February 16. The inventors did not put forward any refutation of your remarks in the cover letter; therefore you should not prepare any companion applications at this time.

Very truly yours,

Les

G. Esler Inskeep

SMOKING COMPOSITIONS PM 944
D&O PM-81-5
COMMENTS AND CORRECTIONS

March 26, 1982

See note concerning monomeric esters, handwritten on interoffice memo by Inventor Southwick.

Page 2, paragraph 4, line 1 The U.S...

Page 3, line 5 delete more

Page 4, line 6 degree in place of form

Page 7, paragraph 3, Inventors say, "We are not sure of this; all monomers will probably distill unchanged."

Misspelling: decarboxylation

Page 8, paragraph 2, lines 7 and 10; 3-methylpentanoate; Inventors say, "Product is not an olefin."

Page 9 second equation, right side:
CO_2R should be CO_2R'

Page 10, paragraph 3, line 1, The polymerized forms...

Page 12, paragraph 3, line 5, formation.

EXAMPLES

Example I, The inventors suggest that Example II might be combined with I to describe the entire sequence.

Example III, title 3-yl

Example IV, title 2-(1-Propenyl) is unnecessary; 2-Propenyl should be used, and should also replace isopropenyl (end of first paragraph).

Paragraph 1, line 5 ...solution of 7g of ethyl...

Paragraph 2, line 2 Celite®

Paragraph 2, line 6 b.p. 55°C.

Example VI, title and paragraph 1, line 1 2-propenyl

Table, page 20, Entries for Fractions 1 and 2 are interchanged. Fr. 1 is yellow solid, m.w. 1233, etc.

Last sentence data were

Also last sentence Ex. VII

Example VIII, paragraph 2, line 3 poly[2-propenyl]

CLAIMS

Claim 16 A hydrogen is missing from the formula.

Claim 3 and others would have a better antecedent if Claim 1 were amended as follows: (following structural formula) or its polymerized form, where R is...

Claims 8,9,14, and 15 ethyl 2-propenyl

A thought on the generalized formula of claims 1 and 12 (also specification): where groups R,R,R', and R^2 are shown, the implication is that R and R are indentical in a given embodiment. This is contradicted by the definitions of R, but would be more clear if one of the R groups were made R^3 amd defined separately. This is strictly a suggestion.
